

Q1:- Gradient Magnitude and Direction

Given Sobel operator values for a pixel

$$G_x = 24$$

$$G_y = 18$$

→ Gradient Magnitude (G):

$$G = \sqrt{(G_x)^2 + (G_y)^2}$$

$$= \sqrt{(24)^2 + (18)^2}$$

$$= \sqrt{900}$$

$$\boxed{G = 30}$$

→ Gradient direction ( $\theta$ ):

$$\theta = \tan^{-1}\left(\frac{G_y}{G_x}\right)$$

$$\theta = \tan^{-1}\left(\frac{18}{24}\right)$$

$$= \tan^{-1}(0.75)$$

$$\theta = 36.87^\circ \approx 37^\circ$$
